ARULRAJ VENKADACHALAM

SENIOR FRONTEND ENGINEER | FRONTEND ARCHITECT

Salem, India · +91 81898 38485 · abofficial1997@gmail.com · LinkedIn · GitHub · Portfolio

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 6+ years building scalable web and mobile applications, leading frontend engineering across three product lines at The Reward Store. Architected a micro-frontend platform shared by four host applications and a 76-component multi-brand design system, shipped native apps and a six-runtime embed SDK, and owns the team's standards, CI/CD, production and AI-assisted engineering workflow.

KEY STRENGTHS

- Frontend Architecture & Micro-Frontends
- Mobile Development & SDK Publishing
- Code Quality Automation & Review
- Performance & Bundle Budgets
- Debugging & Quick Production Fixes
- Design Systems & Multi-brand Theming
- CI/CD, Deployments & Production Ownership
- AI-Assisted Engineering Workflows
- Team Leadership & Mentoring
- Full-stack Delivery (React + Go with AI)

TECHNICAL SKILLS

- **Frontend Engineering:** React 19, TypeScript, JavaScript, React Router 7, Redux Toolkit / RTK Query, Next.js, Vite, Tailwind CSS v4, Radix UI, Styled Components, HTML & CSS; working knowledge of Angular.js, Bootstrap, MUI, Ant Design
- **Frontend Architecture:** Micro-frontends, Module Federation (Rspack, Webpack), design systems (Radix, shadcn/ui, cva), npm publishing (tsup, Changesets), monorepos (pnpm, Turborepo), performance budgets, PWA
- **Testing & Quality:** Playwright, Vitest, Jest, React Testing Library, Storybook, ESLint architecture rules, Husky, size-limit
- **Mobile & SDK Development:** Capacitor, React Native (Expo, CLI, Web), Ionic / Cordova, Firebase (push, Crashlytics, Analytics), App Store & Play Store releases, SDK packaging for iOS / Android / Flutter (basics of Swift, Kotlin and Flutter / Dart)
- **Backend & API Integration:** REST, OpenAPI, GraphQL / Apollo, SSE, Socket.IO, Firebase Auth, OAuth, Razorpay, Google Maps, SSO / OTP / TOTP, WebRTC; AI-assisted Go / gRPC and PostgreSQL work (working knowledge)
- **Cloud & DevOps:** AWS Amplify, CI/CD pipelines, staging & production environments, release management, Netlify, Vercel, Git / GitHub
- **AI-Assisted Engineering:** Claude Code, Cursor, Codex, MCP server authoring, agent skills & hooks, automated review gates, HyperDX / ClickHouse log tracing
- **Engineering Leadership:** Architecture decisions, code review, coding standards, mentoring, team coordination, production support & incident fixes

PROFESSIONAL EXPERIENCE

SENIOR SOFTWARE ENGINEER, FRONTEND

JAN 2025 – PRESENT

The Reward Store, Global Rewards Platform (Vananam Rewards Private Limited)

Leads all frontend engineering and the frontend team for a global rewards company — responsive web and native apps for gift cards, merchandise, flight and bus booking, bill payments, recharges and reward links — across the rewards storefront platform, Rekyndl (loyalty) and Applaud IQ (employee recognition).

- **Micro-frontend platform:** Architected 9 shared storefront remotes on Rspack Module Federation consumed by 4 host applications across three product lines — shared features ship once instead of per product; runtime retry and warm-up keep federated loading reliable.
- **Multi-product delivery:** Built the Rekyndl client and member portals (31 + 14 modules: reward links, multi-tenancy, OTP / SSO / TOTP, RBAC) and the Applaud IQ HR and employee portals (24 modules, SSE realtime, push) from scratch; maintain the storefront, Client Panel, Admin Panel (50+ screens) and Vendor Dashboard.

SENIOR SOFTWARE ENGINEER, FRONTEND — The Reward Store *(continued)* JAN 2025 – PRESENT

- **Design system:** Designed and built @therewardstore/* — 76 accessible Radix + Tailwind v4 components, 6 brands × light/dark + 8 presets with runtime white-labelling, 390+ Playwright e2e specs; 80 versions released in 11 weeks via Changesets, retiring two legacy UI kits.
- **Mobile & SDKs:** Published the storefront and Applaud IQ apps to the App Store and Google Play on a remote-URL Capacitor shell with mandatory updates — every web deploy reaches installed apps without a store review cycle; shipped the Applaud IQ embed SDK for 6 runtimes on one bridge protocol (66 native tests).
- **Scaffolding CLI & packages:** Built @therewardstore/create-app (3 templates, 15 feature layers) so every new repo enforces dependency boundaries, size budgets and bundler settings from its first commit — verified by a 16-row install-and-build matrix with byte-identical output; own 10+ packages on npm, Maven Central, CocoaPods / SwiftPM and pub.dev with semver releases and changelogs.
- **Quality & AI workflow:** Standardised engineering with Claude Code / Cursor / Codex skills, MCP servers for the design system and production logs, and agent hooks that lint touched files and run a fresh-context AI review on 150+ line changes; added-lines-only checks and 95% unit-test coverage (lines and branches) on changed files gate every change before human review of intent and design.
- **CI/CD & production:** Sole owner of frontend delivery — AWS Amplify pipelines with build-time gates, size budgets and source-map stripping block regressions before deploy; run staging and production, store releases, live-issue debugging and hotfixes.
- **Leadership:** Lead frontend delivery and priorities, set coding standards, review pull requests, mentor developers and drive architecture decisions with product and backend (45+ architecture decision records); deliver backend feature logic in Go / gRPC with AI pair-programming when needed.

SOFTWARE ENGINEER JUL 2023 – JAN 2025
Ripple Street India Private Limited, B2H Marketing Platform

- Shipped the iOS and Android React Native apps for a B2H marketing platform to both stores.
- Owned core features and removed redundant code, cutting bundle size by 20% and improving load times.

SENIOR SOFTWARE ENGINEER APR 2022 – JUL 2023
Squash Apps, FinTech & Workplace Solutions

- Led a team of 2 engineers delivering the Payfiniti payment apps for web, Android and iOS on time.
- Built an offline-capable office desk-booking app for Android and iOS with React Native CLI.

FRONTEND DEVELOPER OCT 2021 – MAR 2022
Zita.ai, AI-Powered Recruitment Platform

- Owned the entire frontend of an AI resume-evaluation platform in React.js, from UI/UX to production.
- Streamlined the evaluation flow, cutting candidate selection time by 50% versus the manual process.

FRONTEND DEVELOPER MAY 2020 – OCT 2021
ShopUp, Retailer E-Commerce Platform

- Built a UI component npm library that standardised UI across projects (+30% developer productivity).
- Designed and implemented the product-management interface for the retailer catalogue.

EDUCATION

B.E. — Computer Science Engineering 2017 – 2020
Thiagarajar College of Engineering, Madurai · CGPA: 7.03

Diploma — Electronics & Communication Engineering 2015 – 2017
Thiagarajar Polytechnic, Salem · Percentage: 89%

LANGUAGES

Tamil (Native) | English (Professional Working Proficiency)
